E-Acceptance

User can check the “E-Acceptance Status” by clicking

1. “E-Acceptance” tab, refer to Snippet 1.
2. Once amendment acceptance completed, user is able to view amendment acceptance status, refer to Snippet 2.
3. User to select “Proceed with E-Acceptance” for funding (flow to CRA), Snippet 3. And clicking “Proceed” button, Snippet 4.

Notes:

Sales need to attach the remaining funding documents before submission to CRA.

Scenario 2.3: CILT - Defects Pending Rectification

With this e-Acceptance enhancement, the system is upgraded to allow auto-upload of the relevant documents at the “Defect Upload Document” screen.

How does the “auto-upload” work? **Refer to the Snippet A*

- 1) When rectifying defects, Users will go to the “Defect Upload Document” screen and select the Document Type.
- 2) Once Document Type is selected & “Upload Manual” = No, Users will not need to browse and attach the file manually if the file is available in the system – the “Browse” button will be disabled.
- 3) Click the “Submit” button to auto attach the latest version of the selected Document Type.

Notes:

- ✓ If there is any amendment, the system will take the latest document to upload.
- ✓ For the “Description” box, system will pre-fill the description based on the relevant document attachment. The field shall remain editable for users.
- ✓ If the selected document type is unavailable for auto-upload, then the system will prompt a message to notify Users. **Refer to Snippet B*
- ✓ Users can choose to upload manually by filtering “Upload Manual” = Yes. Users will need to browse and upload the documents as per BAU.

You must correct the following error(s) before proceeding:

Document not exist, please select the document and upload

2.4 Files attachment & acceptance type handling

When the user clicks the button to upload the documents, system will check the application acceptance type (Manual/E-Acceptance)

Scenarios of file attachment :

1. Manual Acceptance Type - system will tag application as manual acceptance type when document upload with document type as CRA HP agreement (manual)

2.E-Acceptance type - system will tag application as e-acceptance type when a document type is CRA HP agreement (e-acceptance).

3. E-Acceptance application change to manual acceptance - system will change previous e-acceptance type to manual acceptance type when new document upload with document type as CRA HP agreement (manual). System will prompt the user to confirm if they would like to proceed with document type as CRA HP agreement (manual).

4.Exception handling of E-Acceptance application wrongly tag to manual acceptance type - user will select document type of CRA HP agreement (E-Acceptance) and system will prompt the user to confirm if they would like to proceed with document type as CRA HP agreement (E-Acceptance). Upon confirmation, the system will grab and attach the LATEST HP agreement. The system would then change the previous wrongly tag manual acceptance to e-acceptance type.

THANK YOU
