

CR: HP075

LOAD\$ HP : Auto Loan E-Acceptance

Functional Requirement Specification

Version: 5.3

Document Legends

Control Type	Description
Display Field	A field that cannot be edited or updated. Used for display purposes only.
Input Field	A field that allows users to input. The data format that can be inputted depends on the data type defined for the field, whether it is varchar or integer, or numeric (for example).
Button	A button for the user to click to trigger a certain action. They are typically used to trigger navigation / submit data to the server.
Search Lookup	A search function for users to search from a specific table and display the search records for selection. Once the user selects the record, the system will retrieve the selected record's code into the field where this search lookup is placed. Usually, it will display as magnifying glass icon 
Dropdown	A picklist that allows users only to select one value from a list of values.
	This icon appears under the "Action" column under a table listing. Clicking this icon will open the particular record detailed page to display the record's data in view mode.
Radio Button	A picklist that allows users to only select one value based on the displayed value.
VARCHAR2	The VARCHAR2 data type is used to store variable-length strings. This means that you define a maximum size, and the strings that you insert into the column will be stored as they are provided. No spaces will be added to the character, like the CHAR datatype. The maximum length of a VARCHAR2 data type is 4000 bytes.

2. INTRODUCTION

This document describes the detailed functional requirement specifications for HP based on signedoff Change Request SOW reference **HLBB/LOAD\$/SOW/2021/272**.

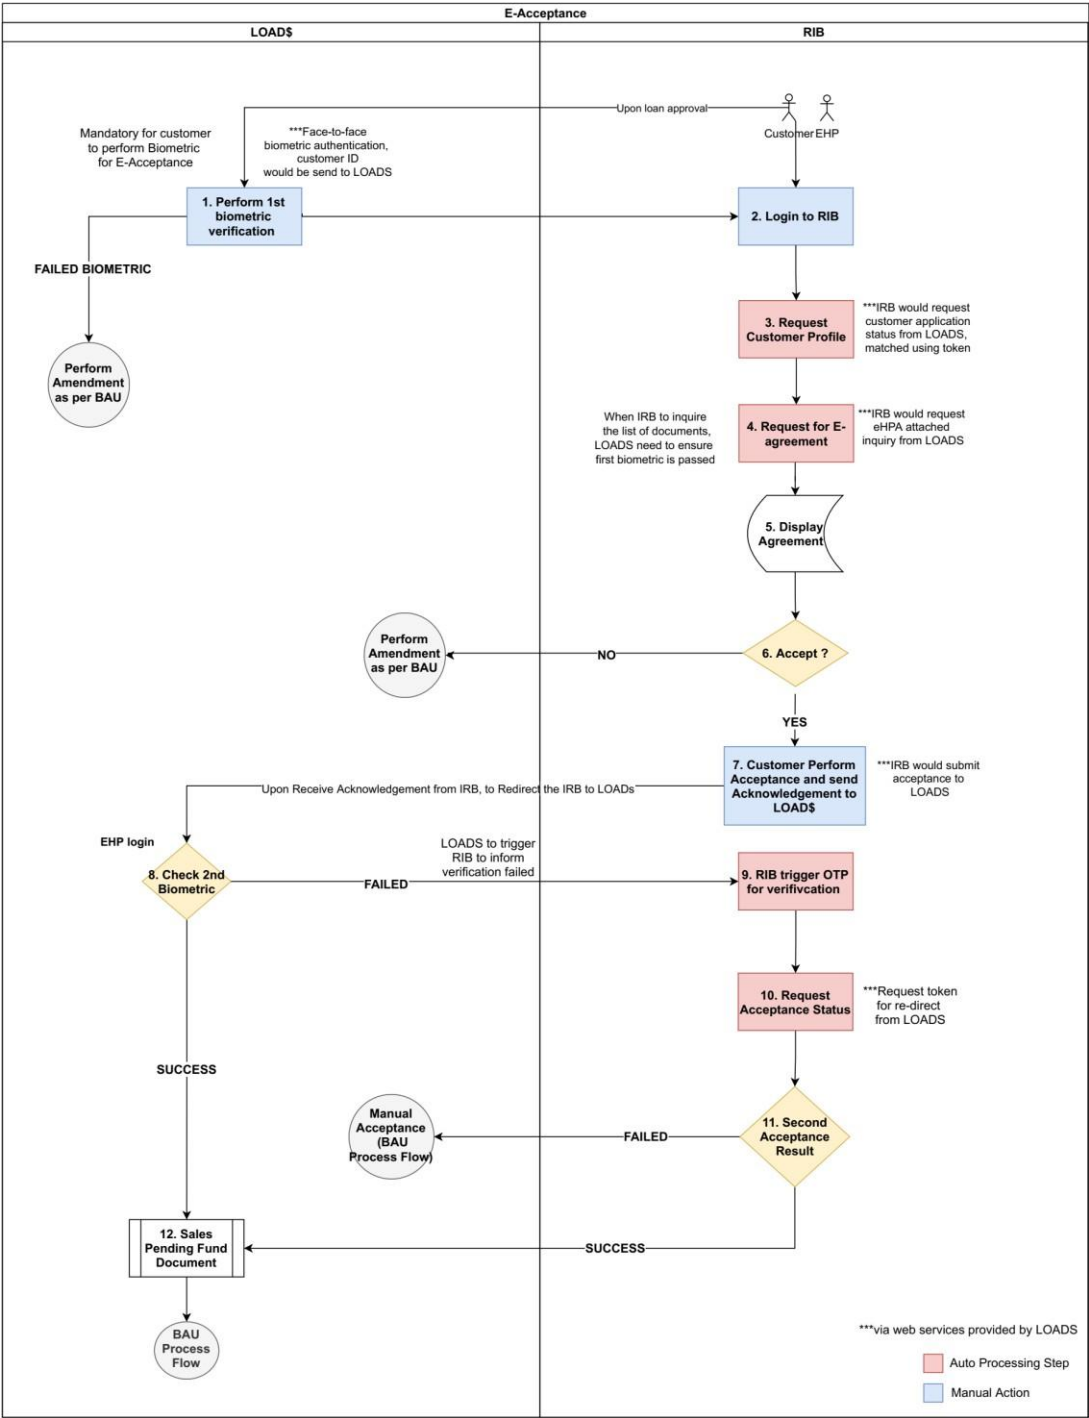

This enhancement enhances the current Loan Origination System for HP products to meet the bank's new requirement to cater to changes in this document.

The electronic acceptance project was introduced as part of the bank-wide digital transformation journey and effort to accelerate the digital journey amidst the COVID-19 pandemic. Today, customers have to meet with bank officers face-to-face to provide their signatures on the bank agreement after biometric identity verification. The journey can be lengthy or tedious, in some instances requiring the customers to visit the branch to sign the agreement.

The electronic acceptance project will elevate the loan agreement signing journey. It will allow customers to sign anytime, anywhere, which will help the bank gain a competitive edge in the market. The loan signing process today is complex, and it involves multiple parties. However, the banking industry has creatively ensured this process complies with the Hire Purchase Act 1967 (backdating some of the documents). Therefore, this journey will also ensure that the business complies with the Hire Purchase Act 1967 requirements.

4. E-ACCEPTANCE PROCESS FLOW

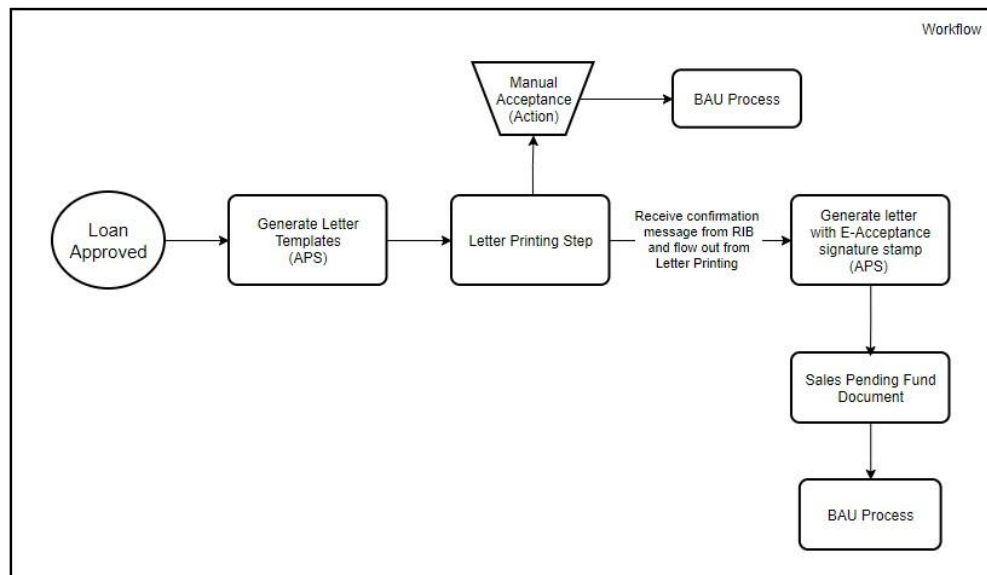

Process flow for Hire Purchase will be enhanced to cater for E-Acceptance as follows:

Note:

HLB to provide the RIB URL that LOAD\$ needs to direct to.

4.1. E-Acceptance Workflow in LOAD\$

4.1.1 Letter Printing (LOAD\$ System)

Process	Letter Printing
Role	LOAD\$ System
Tabs Reference	

- When the application Approved, the case will flow to Letter Printing step.
- At letter printing step, system should have all the letter related available.
- LOAD\$ System will check whether the application eligible to perform E-acceptance. E-Acceptance is only applicable to Individual Hirer without guarantor and Purchase from = Dealer.
- If the application is eligible to perform E-Acceptance, the system shall display the E-Acceptance status as Pending. If the application is not eligible to perform E-Acceptance, the system shall display the E-Acceptance status as Manual.
- If the application is eligible for E-Acceptance is allow to perform E-Acceptance or Manual Acceptance.
- If user wish to perform E-Acceptance, system should behave as below:
 - To start E-Acceptance, customer require to perform biometric verification in order to direct user to RIB to perform acceptance. The application will always remain in letter printing step until LOAD\$ receive the E-Acceptance confirmation flag from RIB. When LOAD\$ receive the EAcceptance confirmation from RIB and completed 2nd verification(2nd Biometric/ OTP) , the application should remain at Letter Printing step and user require to manually Proceed with EAcceptance.
 - If application not eligible or yet to receive confirmation flag from RIB but user want to proceed out from the step with E-Acceptance action, system shall validate and stop user to proceed.
- If the application eligible for E-acceptance but would like to proceed with Manual Acceptance, user will require to proceed the case out from letter printing with Manual Acceptance action and system should validate as per BAU.
- If the case is an appeal case, system shall generate the relevant amendment document and compile it into one PDF document before send to Front End.

4.1.2 Sales Pending Fund Document (LOAD\$ System)

Process	Sales Pending Fund Document
Role	LOAD\$ System
Tabs Reference	

- For E-Acceptance case, when case flow out from letter printing with acceptance flag receive from RIB, system will regenerate another round of letter templates with E-signature.
 - When the case reach Sales Pending Fund Document step, the letters with customer EAcceptance signature will be available and attached to the file attachment screen and EAcceptance status should display as Completed.

4.1.3 Letter Printing E-Acceptance (LOAD\$ System)

Process	Letter Printing E-Acceptance
Role	LOAD\$ System
Tabs Reference	

- For initial acceptance, after the loan is approved from credit approval, the application will flow to a new step Letter Printing E-Acceptance and the application is pending initial acceptance from the customer during that step.
- At this step, the user can select the below actions to proceed.
 - Proceed with E-Acceptance
 - Proceed with Manual Acceptance
- If the user would like to perform E-Acceptance, the customer needs to perform Biometric verification and Acceptance at the RIB screen. Once the acceptance process at RIB and 2nd Biometric (E-Acceptance Confirmation) is completed, the system will auto proceed with the case from Letter Printing E-Acceptance to the BAU letter printing step.
- If the user would like to Proceed with Manual Acceptance, the user needs to select the action 'Perform with Manual Acceptance' and upon the case flow out, the case will route the case to Letter Printing Step and validate as per BAU from that step.
- At the Letter Printing E-Acceptance step, if the acceptance is yet to perform any E-Acceptance acceptance process, users are allowed to perform a CILT appeal at this stage, and the case will route back to the Letter Printing E-Acceptance and treated as an initial E-Acceptance case.

4.1.4 CILT Appeal (LOAD\$ System)

Process	CILT Appral
Role	LOAD\$ System
Tabs Reference	

- For E-Acceptance case, only case after initial acceptance will be treated as E-Acceptance amendment.
- At the Letter Printing E-Acceptance step, if the acceptance is yet to perform any E-Acceptance acceptance process, users are allowed to perform a CILT appeal at this stage, and the case will route back to the Letter Printing E-Acceptance and treated as an initial E-Acceptance case.
- Upon CILT is completed and ready for the customer to perform amendment acceptance, the sales user require to proceed with the case with ready for amendment signing action and the agreement will be ready for amendment acceptance at E-Tracker.
- Upon the customer accepted the amendment and LOAD\$ received an acceptance response from E-Tracker, the system will stamp Hirer Amendment Acceptance into the E-Acceptance Log to indicate that the amendment acceptance process is complete.
- Next, the user can proceed with the case out from Letter printing and continue with the following steps as per BAU.

Note: If amendment performs after flow out from Letter Printing Step, the system compares the field change with the previous acceptance copy and will require the customer to perform another round to acceptance at E-Tracker.

5. SCREEN ENHANCEMENT

The following screens will be enhanced to complement E-Acceptance.

Figure 4.3-2 – Application Inquiry To-Be mock-up screen

5.3.1 Application Inquiry – Field Definition

The field definitions will be as follows:

Field Name	Control Type	Data Type	Mandatory/ Optional (M/C/O)	Remarks
Table results				
E-Acceptance	Display	N/A	N/A	Available values: 1. Manual 2. Pending 3. Fail 4. Completed 5. Blank E-Acceptance status definition: 1. Manual: E-Acceptance is not applicable for the application to proceed with manual acceptance. 2. Pending: Pending customer EAcceptance. 3. Fail: Customer failed to perform EAcceptance (via biometric or OTP) and manual acceptance is required. 4. Completed: E-Acceptance is completed. 5. Blank – Display blank when application yet to reach acceptance stage.

NOTE:

1. The application inquiry list screen will be shared among all users. Hence, all users will be able to view the EAcceptance field.
2. Other fields not mentioned above will follow existing logic.

5.4. CRA Checker Screen

Figure 4.4-1 – CRA Checker As-Is screen

Figure 4.4-2 – CRA Checker To-Be mock-up screen

5.4.1 CRA Checker – Field Definition

The field definitions will be as follows:

	Control Type	Data Type	Mandatory/ Optional (M/C/O)	Remarks
Customer Information (Table)				
Customer Biometric (Non-E)	Checkbox	VARCHAR2 (1)	O	This field is an existing field named 'Biometric'. Field name renamed as 'Customer Biometric (Non – E). Field logic follows as per existing logic. Note: This column is NOT APPLICABLE if the application is E-Acceptance. The tick box will be disabled when the application is E-Acceptance.

Field Name	Control Type	Data Type	Mandatory/ Optional (M/C/O)	Remarks
------------	--------------	-----------	-----------------------------	---------

Identity Verification (E)	Display	VARCHAR2 (50)	N/A	Field to display the biometric status for E-Acceptance Identity Verification. Available values: 1. Matched 2. Unmatched 3. Error (with description) 4. Not Done 5. N/A (If the application is processed via Manual) Note: Biometric status is according to the configuration set in Common Code - BioMetric Status.
Agreement Acceptance Type (E)	Display	VARCHAR2 (50)	N/A	Field to display the type of verification method used by the user to accept EAcceptance. Available values: 1. Biometric 2. OTP 3. N/A (If the application is processed via Manual)
Status (E)	Display	VARCHAR2 (50)	N/A	Field to display the E-Acceptance status. Available values: 1. Manual 2. Completed 3. Pending 4. Blank E-Acceptance status definition: 1. Manual: E-Acceptance is not applicable for the application, to proceed with manual acceptance. 2. Completed: E-Acceptance is completed. 3. Pending: Pending customer EAcceptance. 4. Blank – Display blank when application yet to reach acceptance stage. Note: Pending and Blank status should only display in CRA Checker screen in Application Inquiry.

NOTE:

Other fields not mentioned above will follow existing logic.

5.5. CRA Maintenance Screen

Figure 4.5-1 – CRA Maintenance As-Is screen

Figure 4.5-2 – CRA Maintenance To-Be mock-up screen

5.5.1 CRA Maintenance – Field Definition

The field definitions will be as follows:

Field Name	Control Type	Data Type	Mandatory / Optional (M/C/O)	Remarks
Customer Information (Table)				
Customer Biometric (Non-E)	Checkbox	VARCHAR2 (1)	O	This field is an existing field named 'Biometric'. Field name renamed as 'Customer Biometric (Non – E)'. Field logic follows as per existing logic. Note: This column is NOT APPLICABLE if the application is E-Acceptance. The tick box

Field Name	Control Type	Data Type	Mandatory / Optional (M/C/O)	Remarks
				will be disabled when the application is EAcceptance.
Identity Verification (E)	Display	VARCHAR2 (50)	N/A	Field to display the biometric status for EAcceptance Identity Verification Available values: 1. Matched 2. Unmatched 3. Error (with description) 4. Not Done 5. N/A (If the application is processed via Manual) Note: Biometric status is according to the configuration set in Common Code - BioMetric Status.
Agreement Acceptance Type (E)	Display	VARCHAR2 (50)	N/A	Field to display the type of verification method used by the user to accept EAcceptance. Available values: 1. Biometric 2. OTP 3. N/A (If the application is processed via Manual)
Status (E)	Display	VARCHAR2 (50)	N/A	Field to display the E-Acceptance status. Available values: 1. Manual 2. Completed 3. Pending 4. Blank E-Acceptance status definition: 1. Manual: E-Acceptance is not applicable for the application to proceed with manual acceptance. 2. Completed: E-Acceptance is completed. 3. Pending: Pending customer EAcceptance 4. Blank – Display blank when application yet to reach acceptance stage. Note: Pending and Blank status should only display in CRA Maintenance screen in Application Inquiry.

NOTE:

Other fields not mentioned above will follow existing logic.

5.7.1 Biometric Scanning Details – Field Definition

The field definitions will be as follows:

Field Name	Control Type	Data Type	Mandatory/ Optional (M/C/O)	Remarks
App Ref No.	Display	VARCHAR2 (20)	N/A	Field to display the Application Reference Number (App. Ref. No.).
Verification Type	Display	VARCHAR2 (20)	N/A	Field to display the type of biometric verification. Available values: 1. Identity Verification 2. E-Acceptance Confirmation 3. Manual Acceptance Verification Biometric verification type definition: 1. Identity Verification – Identity verification for EAcceptance. 2. E-Acceptance Confirmation – New verification type used to verify customer biometrics when they are accepting loans via E-Acceptance. 3. Manual Acceptance Verification- Biometric verification via manual acceptance.
Start Biometric Scan	Button	-	N/A	This field is an existing Button named 'Biometric Scan'. Button renamed as 'Start Biometric Scan.'

				Button logic follows as per existing logic.
Report	Button	-	N/A	Existing Button. Report being enhanced to have the same information on the screen. (Refer to Section 8.2 Biometric Report for more details.

NOTE:

Other fields not mentioned above will follow existing logic.

Scenarios to be Covered in Biometric Verification

Scenario	1 st Biometric (Identity Verification)	Acceptance Flag	2nd Biometric (E-Acceptance Confirmation)	Expected Result
1.	Matched	Yes	Not Done	1. If the 1st biometric verification has been completed the first time and the Acceptance Flag is 'YES', the following message will be prompted if the sales user (EHP) attempts to perform another round of 1st biometric verification: <i>"The biometric for Identity Verification is completed. Please perform the biometric for E-Acceptance Confirmation."</i> 2. LOAD\$ will then direct the sales user (EHP) to the RIB portal to review and accept the agreement.
2.	Matched	No	Not Done	Sales user (EHP) to perform the first 1 st biometric again as the acceptance flag is 'NO'. Once this is completed and successful, LOAD\$ will direct the sales user (EHP) to the RIB portal to review and accept the documents.
3.	Matched	Yes	Matched	If the 1st and 2nd biometric verification have been completed and the Acceptance Flag is 'YES', the following message will be prompted if the sales user (EHP) attempts to perform another round of 1st biometric verification: <i>"The biometric for Identity Verification and E-Acceptance Confirmation has been completed"</i>. In a scenario where the customer requests to re-view the Thank You screen again for assurance, LOAD\$ will not redirect the

				sales user (EHP) to the RIB Thank You screen. The redirection will only be done on the first-instance of successful 2nd biometric verification. This is also to limit and control unintended action by the sales user (EHP). Note: To add in scenarios as to why the customer may need to perform the biometric again after performing both the biometric? This to be advice by business
--	--	--	--	---

5.8. E-Acceptance Button *New*****

A new 'E-Acceptance' button will be at the footer section of the application. The visibility of the E-Acceptance button will be control by access control.

Access control needs to be granted to the following user group.

- a) EHP team
- b) CRA team

Figure 4.8-1 – E-Acceptance Button To-Be mock-up screen

When the sales user (EHP) clicks the 'E-Acceptance' button, a pop-up window of the E-Acceptance screen (Refer to [Section 4.9](#)) will be displayed.

Note:

1. The 'E-Acceptance' button will be enable there are E-Acceptance record regardless the status have been change to 'Manual'
2. The 'E-Acceptance' button will not display if the application is a end to end Manual Acceptance case.

Figure 4.11-1 – File Attachment mock-up screen

5.11.1 File Attachment Screen – Field Definition

The field definitions will be as follows:

Field Name	Control Type	Data Type	Mandatory/ Optional (M/C/O)	Remarks
File Attachment (Header)				
Document Type	Dropdown List	N/A	M	Additional document types will be included in the dropdown list. 1. CRA HP Agreement (Manual) 2. CRA HP Agreement (E-Acceptance) Note: Document code will be maintained in common code, UPLOAD_DOC_CHKLIST. Document code to be maintained by CS Admin.
Submit	Button	N/A	N/A	When the user clicks the button to upload the documents, the system will check the application acceptance type (Manual/EAcceptance). 1. Manual Acceptance Type - system will tag application as manual acceptance type when document upload with document type as CRA HP agreement (manual)
Field Name	Control Type	Data Type	Mandatory/ Optional (M/C/O)	Remarks

				2. E-Acceptance type - system will tag application as e-acceptance type when a document type is CRA HP agreement (e-acceptance). • E-Acceptance application change to manual acceptance - system will change previous e-acceptance type to manual acceptance type when new document upload with document type as CRA HP agreement (manual). System will prompt the user to confirm if they would like to proceed with document type as CRA HP agreement (manual). • Exception handling of E-Acceptance application wrongly tag to manual acceptance type - user will select document type of CRA HP agreement (E-Acceptance) and system will prompt the user to confirm if they would like to proceed with document type as CRA HP agreement (EAcceptance). Upon confirmation, the system will grab and attach the LATEST HP agreement. The system would then change the previous wrongly tag manual acceptance to eacceptance type.
--	--	--	--	---

NOTE:

Other fields not mentioned above will follow existing logic.

6. E-ACCEPTANCE DEFECTS ATTACHMENT

In line with the existing process, users are allowed to rectify defects when required. However, moving towards the digital documentation journey, a back-end solution will be introduced in this enhancement to auto-upload the relevant documents at the Defect Attachment screen.

Detailed process is as below:

1. When the user wishes rectifies the defects, the user goes to the defect upload document screen and selects the document type.
2. Once the document is selected, the user does not need to attach the file if the file is available in the attachment screen (which means no need to browse or bypass this mandate field).
3. Click the submit button, and the system will auto attach the latest version of the selected document to the document listing.

Remark:

1. If there is an amendment, the system will take the latest document to upload.
2. For the description box, the system shall pre-fill the description from the applicable document attachment screen description. This field is editable by the users.
3. If the selected document is unavailable, the system shall prompt the message' document not exist, please select the document and upload'.

4. If the user wants to upload the document manually, the user may select 'Yes' at the Upload Manual field, as illustrated below. However, if the user selects 'Yes', the system will require the user to browse and upload a document as per BAU.

This is an agreed and, we, acknowledge the new requirement. The commercials shall be concluded at a later date.

Figure 5-1 – Defect Upload Document To-Be mock-up screen

6.1.1 Defect Upload Document Screen – Field Definition

The field definitions will be as follows:

Field Name	Control Type	Data Type	Mandatory/Optional (M/C/O)	Remarks
File Attachment (Header)				
Upload Manual	Radio Button	N/A	M	Available value: 1. Yes – Upload Manual with file attachment. 2. No – System auto attach if attachment is available.
File	File Browser	N/A	O	This field will work according to the selection of Upload Manual: 1. If the Upload Manual value is Yes, this field will work according as BAU. Attachment upload is mandatory. 2. If the Upload Manual value is No, this field is will not mandatory user to upload document.
Submit	Button	N/A	N/A	When user click the Submit button

NOTE:

Other fields not mentioned above will follow existing logic.

7. E-ACCEPTANCE AMENDMENT

In tandem with the existing process that allows applications to perform amendments when there is any change in loan term or collateral details, any changes to the information from the initial agreement acknowledged and digitally signed are required to be updated and submitted to the customer for acceptance via eTracker.

Here, the customer will be able to view the documents which highlight the changes done.

To cater to this requirement:

1. New mechanism to track changes on fields for multiple amendment index (tracking of changes applied each unique fields in template) to indicate fields are updated during amendment.
2. Documents with detected changes will be generated and fields highlighted in different font colors based on the amendment index and flag for cumulative changes before the user triggering SMS to inform the customer of amendment readiness for acceptance.
3. Only documents with changes detected will be sent to Front End for 2nd signing.

Amendment requests are only applicable upon the completion of the 2nd Biometric E-Acceptance.

Upon amendment, the system would generate the amended document and attached it to the attachment screen. Next, the system would identify the flag of the E-Acceptance Amendment Flag based on the generated amended document. This flag will be used to determine if the flow is a clean acceptance flow or amended acceptance flow.

7.1. E-Acceptance Amendment Fields

The fields involved in amendment tracking as per the template is as follows:

1. Hire Purchase Agreement – Part 1

NO	FIELD
1.	Name
2.	Address
3.	Description of Goods
4.	New/Second-hand
5.	Goods to be kept at
6.	Financial Amount
7.	Interest Rate
8.	Total Amount
9.	Balance originally payable under this agreement
10.	Annual Percentage Rate of Term Charges
11.	Duration of payment by installment in number of month of years
12.	Number of Installment
13.	Final Installment

2. Hire Purchase Second Schedule PART I

NO	FIELD
1.	Full Name
2.	Short description of goods

3.	Registration number
4.	New/Second Hand
5.	Address where goods will be kept
6.	Cash price of goods*
7.	Deposit
8.	Cash price less deposit
9.	Freight charges
10.	Vehicle registration fee
11.	Insurance/ Takaful
12.	Rate per annum
13.	Total amount of term charges / mark-up
14.	Balance originally payable under the agreement
15.	Annual Percentage Rate
16.	Hire Purchase Price
17.	Difference between cash price of the goods and the total amount you will have to pay
18.	Duration of Payment of instalment in number of months or years
19.	Number of Installment
20.	Amount of each Installment
21.	Final Installment

3. Appendix 4 Customer or Hirer Indemnity Letter

NO	FIELD
1.	Dealer/Vendor
2.	Vehicle Model
3.	Engine No.
4.	Chassis No.
5.	Full Name

4. Product Disclosure Sheet

NO	FIELD
1.	Total amount financed
2.	Tenure
3.	Base Lending Rate (BLR):
4.	Interest Rate
5.	Annual Percentage Rate
6.	Your monthly instalment
7.	Total repayment amount

8. INFOBIP

The Infobip solution is as per illustration below:

The mock-up screen displays the following information:

E-Acceptance

Name : Tan Ming Lee (901103-03-5678)
App. Ref. No.: 888/HP/2021/L0000032
Bank Name: Hong Leong Bank Berhad
Lending Type: Conventional
Loan Account No.: 385463212100
SMS Infobip Status: Delivered
Reason: DELIVERED_TO_HANDSET
Done At: 19/10/2021 19:30:55

Applicant	Relationship to Application
Tan Ming Lee	Primary Applicant

Close Print log Trigger Amendment SMS

E-Acceptance Type	Product Disclosure Sheet	Application Form	Second Schedule Part I	HP Agreement & Term & Conditions	Appendix 4	E-Acceptance Status	E-Acceptance Date Time	Remark
Hirer Initial Acceptance	Y	Y	Y	Y	Y	Completed	20/11/2021 11:25 AM	Biometric Acceptance
Bank Acceptance	Y	Y			Y	Completed	28/11/2021 09:25 PM	Funded

Figure 7-1 – E-Acceptance To-Be mock-up screen with Infobip SMS status.

1. As long LOAD\$ receives a response from Infobip, regardless if it is a success or failure response, the system will disable the trigger SMS button. This means users are not allowed to retrigger the SMS at the E-Acceptance screen.
2. In the event when LOAD\$ does not receive a response, the system will allow users to retrigger the SMS by clicking trigger SMS button.
3. LOAD\$ shall display the SMS status on the same screen so that the user does not need to go to another tab to check the status.

Note(s):

The complete list of reasons will be provided at a later stage during development.

9. REPORT

9.1. E-Acceptance Print Log

From the E-Acceptance Popup, the user will be able to click on the 'Print Log', and the following report will be generated on an application basis:

E-Acceptance Report

Name : Tan Ming Lee (901103-03-5678)
Relationship to Application: Primary Applicant
App. Ref. No.: 888/HP/2021/L0000032
Bank Name: Hong Leong Bank Berhad
Lending Type: Conventional
Loan Account No.: 385463212100

E-Acceptance Type	Product Disclosure Sheet	Second Schedule Part I	HP Agreement & Term & Conditions	Appendix 4	E-Acceptance Status	E-Acceptance Date Time	Remark
Hirer Initial Acceptance	Y	Y	Y	Y	Completed	20/11/2021 11:25 AM	Biometric Acceptance
Bank Acceptance	Y			Y	Completed	28/11/2021 09:25 PM	Funded

Figure 8.1-1 – To-Be mock-up E-Acceptance Print Log report

Field Definition for E-Acceptance Print Log (refer to [Section 8.1](#)).

Note:

The report generation will be on an application basis.

9.2. Biometric Report

A report template will be downloaded upon clicking the "Report" button in the Biometric Scanning Details Screen (refer to Section 4.7).

Additional row required to be added to the Biometric Report. Sample report layout as per follows:

HONG LEONG BANK BERHAD / HONG LEONG ISLAMIC BANK BERHAD	
BIOMETRIC REPORT	
App. Ref. No	BDR/HP/2021/L0000035
Name	Tan Ming Lee
ID No	901103-03-5678
Staff ID	00333
Date & Time Request	2021-10-05 20:08:26.0
Date & Time Response	202110-05 20:08:35.0
Biometric Status	Unmatched
Verification Type	E-Acceptance Confirmation
Triggering Point	Letter Printing
Triggering Counter	3
Remarks	This remark is a free text. Completed.

Figure 8.2-1 _ To-Be mock-up Biometric report

9.2.1 Biometric Report – Field Definition

The field definitions will be as follows:

Field Name	Control Type	Data Type	Mandatory/ Optional (M/C/O)	Remarks
Verification Type	Display	VARCHAR2 (20)	N/A	Field to display the type of biometric verification. Available values: 1. Identity Verification 2. E-Acceptance Confirmation 3. Manual Acceptance Verification Biometric verification type definition: 1. Identity Verification – Identity verification for EAcceptance. 2. E-Acceptance Confirmation –
Field Name	Control Type	Data Type	Mandatory/ Optional (M/C/O)	Remarks
				New verification type used to verify customer biometrics when they are accepting loans via EAcceptance. 3. Manual Acceptance Verification- Biometric verification via manual acceptance.

NOTE:

Other fields not mentioned above will follow existing logic.

9.3. CRA Report

A report template will be downloaded upon user clicking the "Report" button in the Application Screen.

Additional columns required to be added into the CRA Report. Sample report layout as per follows:

Printed by: adminkm1
17/08/2021 11:03 PM

CRA REPORT

CA No : BBB/HP/2021/L0000004 (3)	CP No : 289/HP/2021/L0000004
Application Date : 10 May 2021	Delivery Channel : HLB-KLM
Source : CAR FAIR	EHP/PFC Name : saleskm
Product Type : F140 - F140 HP Direct_New Vehicle	EHP/PFC Staff ID : saleskm
Lending Type : Conventional	EHP PFC Contact Number :
Loan Account Number : 100000584	BM/ALCM Name : Chong Wan Thing
Funding Date : 11 May 2021	BM/ALCM Staff ID : 30285
Agreement Date : 12 May 2021

KM	36222688	Primary Applicant		Identity Card - Blue	900909-09-9001	09/09/1990	Malaysia	Yes

Identity Verification (E)	Agreement Acceptance Type (E)	Status (E)
Matched	Biometric	Completed

Figure 8.3-1 _ To-Be mock-up CRA report

9.3.1 CRA Report – Field Definition

The field definitions will be as follows:

Field Name	Control Type	Data Type	Mandatory/ Optional (M/C/O)	Remarks
Customer Information (Table)				
Customer Biometric (Non-E)	Checkbox	VARCHAR2 (1)	O	This field is an existing field named 'Biometric'. Field name renamed as 'Customer Biometric (Non – E). Field logic follows as per existing logic. Note: Displays 'Blank' if the application is E-Acceptance

Identity Verification (E)	Display	VARCHAR2 (50)	N/A	Field to display the biometric status for EAcceptance. Available values: 1. Matched 2. Unmatched 3. Error (with description) 4. Not Done 5. N/A (If the application is processed via Manual) Note: Biometric status is according to the configuration set in Common Code - BioMetric Status
Agreement Acceptance Type (E)	Display	VARCHAR2 (50)	N/A	Field to display the type of verification method the user used to accept E-Acceptance. Available values: 1. Biometric 2. OTP 3. N/A (If the application is processed via Manual)
Status (E)	Display	VARCHAR2 (50)	N/A	Field to display the E-Acceptance status. Available values: 1. Manual 2. Completed E-Acceptance status definition: 1. Manual: E-Acceptance is not applicable for the application, to proceed with manual acceptance. 2. Completed: E-Acceptance is completed.

NOTE:

Other fields not mentioned above will follow existing logic.

9.4. HP Funding Report

In this enhancement, **HP Funding Report (2)** will include additional information as below:

1. Identity Verification (E)
2. E-Acceptance Status (E)
3. Agreement Acceptance Type (E)

9.4.1 HP Funding Report – Field Definition

The field definitions will be as follows:

Field Name	Control Type	Data Type	Mandatory/ Optional (M/C/O)	Remarks
Customer Information (Table)				
Customer Biometric (Non-E)	Checkbox	VARCHAR2 (1)	O	This field is an existing field named 'Biometric'. Field name renamed as 'Customer Biometric (Non – E). Field logic follows as per existing logic. Note: Display 'Blank' if the application is EAcceptance
Identity Verification (E)	Display	VARCHAR2 (50)	N/A	Field to display the biometric status for E-Acceptance. Available values: 1. Matched 2. Unmatched 3. Error (with description) 4. Not Done 5. N/A (If the application is processed via Manual) Note: Biometric status is according to the configuration set in Common Code - BioMetric Status
Agreement Acceptance Type (E)	Display	VARCHAR2 (50)	N/A	Field to display the type of verification method the user used to accept EAcceptance. Available values: 1. Biometric 2. OTP 3. N/A (If the application is processed via Manual)
Field Name	Control Type	Data Type	Mandatory/ Optional (M/C/O)	Remarks

Status (E)	Display	VARCHAR2 (50)	N/A	Field to display the status of EAcceptance. Available value: 1. Manual 2. Completed E-Acceptance status definition: 1. Manual: E-Acceptance is not applicable for the application, to proceed with manual acceptance. 2. Completed: E-Acceptance is completed.
------------	---------	------------------	-----	--

NOTE:

Other fields not mentioned above will follow existing logic.

10. INTERFACES

10.1. Infobip SMS Gateway

A new Infobip gateway will be introduced to deliver SMS to the customer. Triggering of SMS to the customer on E-Acceptance Amendment notification will be delivered via Infobip Gateway.

For template setup with Gateway = 'Infobip', the system sends the SMS records to Infobip, and the record will not be delivered via M3Tech Gateway.

For template setup with Gateway = 'Exchange' or blank value, system to send SMS records to M3Tech gateway.

Reference database table:

1. SYS_INFOBIP_LOG

10.2. E-Acceptance Interface

LOAD\$ Service

Applications eligible for the E-Acceptance process will have the applicant's details and attachments available for request in the following interface messages:

1. Application Status Inquiry (LOAD\$ Trx Code: APL_STAT_INQ (EAI Trx Code: 423001))
 - In this enhancement HLBMS-15235, LOAD\$ will further enhance to send the To send value under hpAgreementInd in APP_STAT_INQ message to cater for EAcceptance Signing logic indicate whether the amendment document is ready for acceptance.
 - The value sent under hpAgreementInd in APP_STAT_INQ message will according to logice below:

eAcceptance Indicator (A)	1st Signing Complete (B)	Ready for 2nd Signing (C)	2nd Signing Complete (D)	*eTracker Status (Existing Field) (E)	hpAgreementInd value send APP_STAT_INQ
Y	Y	<Blank>	<Blank>	APPR1 or APPR2	1
Y	Y	Y	<Blank>	APPR1 or APPR2	2
Y	Y	Y	Y	APPR1 or APPR2	3
<Blank>	Y	<Blank>	<Blank>	APPR1 or APPR2	4
<Blank>	Y	Y	<Blank>	APPR1 or APPR2	5
<Blank>	Y	Y	Y	APPR1 or APPR2	6

2. Document Inquiry (LOAD\$ Trx Code: EHPA_ATTACH_INQ (EAI Trx Code: New))
3. Download Attachment Inquiry (LOAD\$ Trx Code: DLOAD_ATTACH_INQ (EAI Trx Code: New))

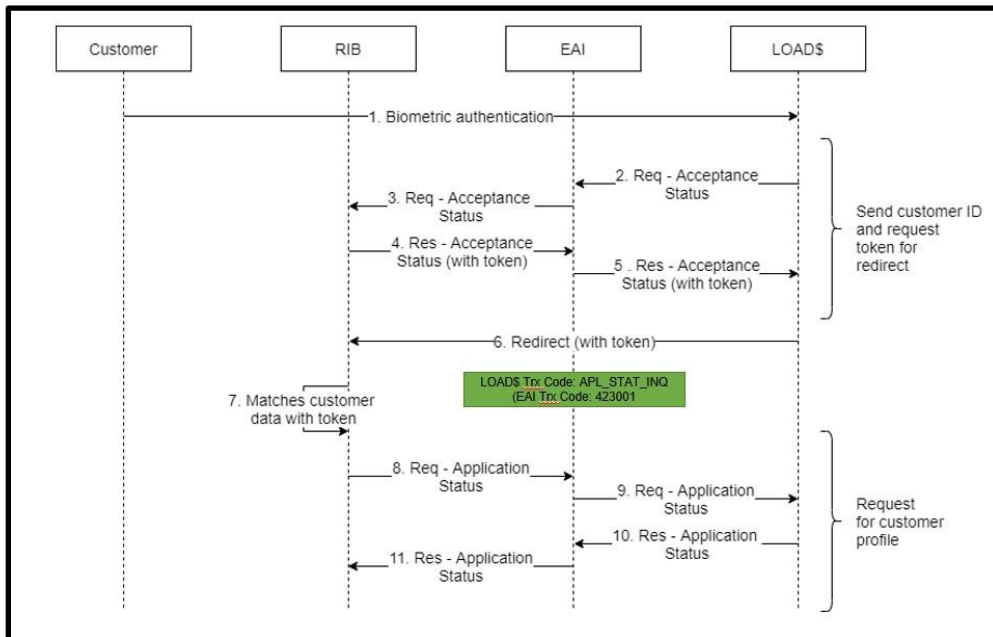

E-Acceptance status by a customer to be returned in the following interface message:

1. Acceptance Decision Message (LOAD\$ Trx Code: LD0008 (EAI Trx Code: 421015))

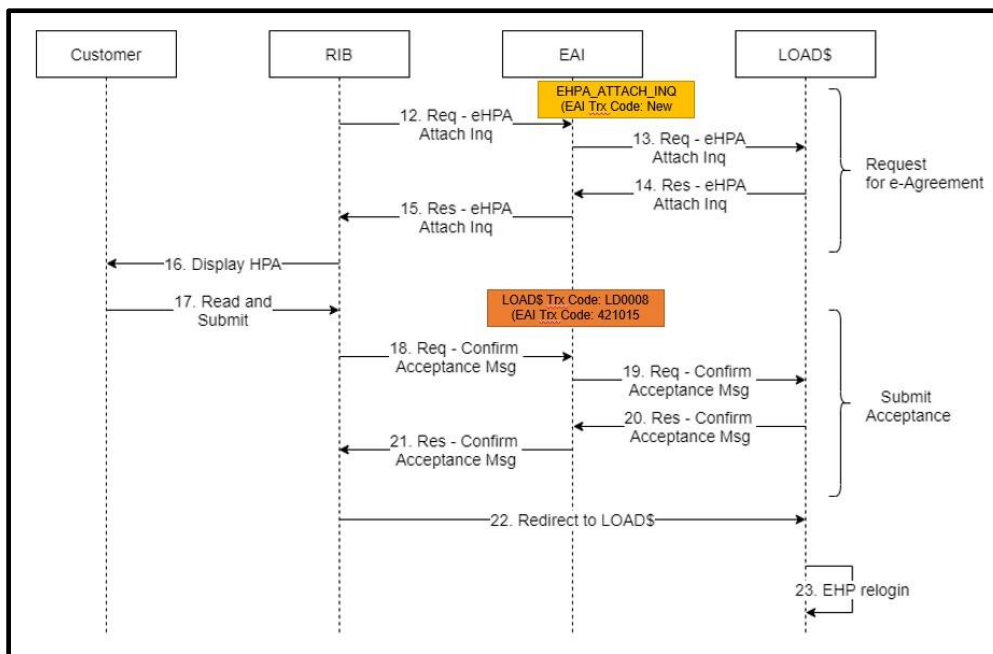

Technical Note:

Interface log to be captured in LOSA_SR_LOG, origins json log, and origins eai req resp log.

The mapping of the interface messages above to the IT diagram would be as follows:

Picture 1: System flow – e-Acceptance (Application Status Inquiry)

Picture 2: System flow – e-Acceptance (Document Inquiry & Acceptance Decision Message)

RIB Service

Biometric verification status and acceptance status in LOAD\$ will be updated to RIB via a new interface message.

Technical Note:

Interface log to be captured in EAI_LOG and origins eai req resp log.

Field information on the interface messages is detailed under the TRS document.

11. SCHEDULER

Existing scheduler enhancement as follows:

No	Scheduler Name	Scheduler Description	Details	Existing/ New
1.	executeAutoCRAEmailTrigger (HP069)	Auto CRA Email Msg Create Trigger	Note: e-HP Agreement compilation has been enhanced to be handled under workflow function generateCRACompile. Execute Time: Every 5 minutes, at 01:00 AM, 02:00 AM, 03:00 AM, 04:00 AM, and 05:00 AM **Existing Scheduler**	Existing
2.	executeGenerateLHDNXML FileJobTrigger	Generate LHDN XML File (Sample as per appendix)	Enhance criteria for LHDN XML generation. According to acceptance type, system will generating LHDN XML accordingly. If the application is accepted through E-acceptance, LHDN XML will be generated for EAcceptance applications which contain of the digital agreements and E-Acceptance report. If the application is accepted through Manual Acceptance, LHDN XML will generate the LHDN XML as per current BAU . To separate the bulk submission text file between the e-acceptance and none-acceptance Execute Time: At 06:30:00am every day **Existing Scheduler**	Existing
3.	batchSendSmsTrigger	Send Batch SMS Job	Enhance to exclude the amendment notification SMS records that will send via Infobip gateway. Execute Time: Every 30 minutes, between 08:00 AM and 07:59 PM **Existing Scheduler**	Existing

12. WORKFLOW

12.1. Workflow Function

New/existing workflow function will be added/enhanced as below:

Function Name	Details	Remarks and Logic	Existing/ New
generateLetter	To generate letters and store the attachment in the database.	This is an existing function. In this enhancement, the system will generate additional documents related to E-Acceptance when an applicant is eligible for E-Acceptance. In this enhancement, there will be a additional parameter, to identify the generated E-Acceptance related document need to be convert to base 64 (doc attachment format) before sending to the front end. Note: The system should not overwrite the initial signed letter after the amendment is performed.	Existing
convertLetterFormat Function included in generateLetter function	To convert generated letter to base64 format.	In this enhancement, the system needs to convert the generated E-Acceptance related document to base 64 (doc attachment format) before sending to the front end. Note: RIB will covert the letters sent from LOAD\$ from base 64 format to PDF format and display it on the front end.	New
compileDocAttach	To compile attachments into one single document in pdf format.	Function to compile attachment into one single PDF document and attach the document in the attachment screen. This function should be able to parameterize the document to compile and by sequence. Example: Compile Document HPA - HP AGREEMENT (PART 1) – Sequence 1 HPTC - TERMS & CONDITIONS – Sequence 2	New

		In the enhancement HLBMS-15026, this function	
--	--	---	--

		be used to compile the generated amendment documents and merge into one PDF document. Amendment Document will be compile: 1. HP Agreement Part 1 2. Hire Purchase Second Schedule PART I 3. Appendix 4 Customer or Hirer Indemnity Letter (only applicable if the collateral is used/reconveyed vehicle). 4. Product Disclosure Sheet Note: The compilation will based on the field changes to generate the impacted amendment Documents and compile.	
attachLetter	To stamp the digitally signed data to the document and attach the signed document to the attachment screen.	This enhancement enables the signed document to be attached in the attachment screen after the user performs loan acceptance (either biometric or OTP). Letter to be attached: 1. HP Agreement Part 1 2. Hire Purchase Second Schedule PART I 3. Appendix 4 Customer or Hirer Indemnity Letter (only applicable if the collateral is used/reconveyed vehicle). 4. Product Disclosure Sheet Note: Amendment documents should not be overwritten All letters needs to be attached to the attachment screen.	New
generateCRACompile	To compile HP Agreement documents.	This function will be enhanced to compile e-Signed documents if an application is E-Acceptance. Document: 1. HP Covering Letter (generated copy) – split by Hirer and Guarantor (guarantor option if an application has guarantor) 2. HP Agreement Part 1 (E-Acceptance) (from attachment) 3. HP Agreement Appendix (generated copy) 4. Guarantee Agreement (if available) (from attachment) *mandatory if an application has Guarantor Note: E-Acceptance is only applicable to Individual Hirer without guarantor and Purchase from = Deal	Existing

		In this scenario, the covering letter for guarantor and the guarantee agreement is not applicable. Existing logic remains for applications with manual acceptance.	
generateLHDNXml	To generate LHDN XML	This function will be enhanced to attach e-Signed documents if an application is E-Acceptance. Hirer Document: 1. Compiled HP Agreement & T&C (EAceptance) 2. Appendix 3. LHDN log Existing logic remains no change as the generation of additional templates and to splitting between manual acceptance and E-Acceptance will be at scheduler: executeGenerateLHDNXMLFileJobTrigger	Existing
insertLosaBiometric	To insert Biometric record.	This function will be used to insert Biometric Record when the application Eligible for E-Acceptance.	New
stampEAceptanceData	E-Acceptacne data stamping function	Stamp E-Acceptance related fields into EAceptance table: 1. Application Ref No. 2. Application Status 3. E-Acceptance Status i. Pending – Application eligible for EAceptance. ii. Completed - Application completed with 2nd Biometric. iii. Manual - E-Acceptance is not applicable for the application, to proceed with manual acceptance. iv. Failed – Application eligible but failed to perform 1st or 2nd Biometric. 4. E-Acceptance Date Time 5. E-Acceptance Type i. Initial Acceptance ii. Admenment 6. Product Disclosure Sheet 7. Second Schedule Part 1 8. HP Agreement and Term & Condition 9. Appendix 4 10. Remark	New
StampEAceptInd	To stamp the E-Acceptance indicator	This function is to stamp the fields as per requirement (Logic to refer section 11.1.1)	New
initiateEAceptInd	To stamp the indicator back to blank.	This function is to stamp the Ready for 2nd Signing and 2nd Signing Complete indicator back to blank after approve for second and subsequent amendment.	New

12.1.1 StamEAcceptInd function stamping logic

	Remarks	E-Acceptance	Non E-Acceptance
eAcceptance Indicator	To put this field in eTracker Detail Table, and system to stamp the value accordingly.	(i) Case with eAcceptance Indicator Then, system set value to Y.	(i) Case without eAcceptance Indicator Then, system set value as <blank>.
1st Signing Complete	To put this field in eTracker Detail Table, and system to stamp the value accordingly.	(i) Case with eAcceptance Indicator (ii) System will based on the first time system trigger the stampAcceptance date to stamp this flag to Y Note: 1st Signing Complete indicator need to stamp to Y when customer complete 2 nd biometric. If user failed to attempt for 2 nd biometric, the 1st Signing Complete indicator will stamp to Y when LOAD\$ receive OTP success message from RIB.	(i) Case without eAcceptance Indicator (ii) System will based on the first time system trigger the stampAcceptance date to stamp this flag to Y
Ready for 2nd Signing	To put this field in eTracker Detail Table, and system to stamp the value accordingly.	(i) Case with eAcceptance Indicator (ii) When user trigger action Ready for Amendment Acceptance at Letter Printing Step Then, system set value to Y.	(i) Case without eAcceptance Indicator (ii) When case exit out from generation of HP Agreement docs and system check if the acceptance date is not blank Then, system set value to Y.
2nd Signing Complete	To put this field in eTracker Detail Table, and system to stamp the value accordingly.	(i) Case with eAcceptance Indicator (ii) When AEM/RIB returned with Successful Signing of Amendment/2nd Signing (Decision = AC + 2nd Signing Flag) (iii) When "Ready for 2nd Signing" = Y Then, system set value to Y.	(i) Case without eAcceptance Indicator (ii) When proceed out from letter printing step where acceptance date is not null (iii) "Ready for 2nd Signing" field =Y Then, system set value to Y.

12.2. Workflow Condition

New/existing condition function as below:

Condition Name	Details	Remarks and Logic	Exisiting/ New															
checkCRAEMAILInd	To check the ecompile generation criteria and LHDN XML generation criteria.	Condition for e-compile agreement generation criteria routing and LHDN XML generation criteria routing. Delivered under HLBMS-13059.	Existing															
checkEAcceptanceOn	To check if the application should route to E-Acceptance workflow.	Condition to check if the application should be routed to E-Acceptance workflow according to general constant value of E_ACCEPTANCE_ON_OFF and E_ACCEPTANCE_GOLIVE_DATE. <table><tr><th>E_ACCEPTANCE_ON_OFF</th><th>E_ACCEPTANCE_GOLIVE_DATE</th><th>Expected Result</th></tr><tr><td>ON</td><td>After or equal to application creation date</td><td>The eligible application to perform EAcceptance will be routed to the EAcceptance workflow.</td></tr><tr><td>OFF</td><td>Before application creation date</td><td>Applications will route according to BAU workflow.</td></tr><tr><td>ON</td><td>Before application creation date</td><td>Applications will route according to BAU workflow.</td></tr><tr><td>OFF</td><td>After or equal to application creation date</td><td>Applications will route according to BAU workflow.</td></tr></table>	E_ACCEPTANCE_ON_OFF	E_ACCEPTANCE_GOLIVE_DATE	Expected Result	ON	After or equal to application creation date	The eligible application to perform EAcceptance will be routed to the EAcceptance workflow.	OFF	Before application creation date	Applications will route according to BAU workflow.	ON	Before application creation date	Applications will route according to BAU workflow.	OFF	After or equal to application creation date	Applications will route according to BAU workflow.	New
E_ACCEPTANCE_ON_OFF	E_ACCEPTANCE_GOLIVE_DATE	Expected Result																
ON	After or equal to application creation date	The eligible application to perform EAcceptance will be routed to the EAcceptance workflow.																
OFF	Before application creation date	Applications will route according to BAU workflow.																
ON	Before application creation date	Applications will route according to BAU workflow.																
OFF	After or equal to application creation date	Applications will route according to BAU workflow.																
isEAccptAmendFieldChange	To check if there are any changes in the letter templates field after amendment.	To check if there any fields in the letter templates that require changes after the user performs amendment. If yes, the system will to perform another round of letter generation. In the generated letters, the field with changes will be compared to the previous document, and the system will highlight the field.	New															
CheckEAccpetnaceStatus	To check the E-Acceptance status	To check the E-Acceptance status to stamp the document with E-Acceptance data.	New															

CheckEAcceptanceEligible	To check if the application is eligible to perform EAcceptance.	Condition to check if an application is eligible for EAcceptance. To be eligible requires the application to be an individual without a guarantor.	New
--------------------------	---	--	-----

12.3. Workflow Validator

New/existing validator function as below:

Condition Name	Details	Remarks and Logic	Exisiting/ New
ValidateEAcceptanceEligible	To validate if the application is eligible to perform EAcceptance.	The system to validate if an application is eligible for E-Acceptance. To be eligible requires the application to be an individual without a guarantor and Purchase from = Dealer which will determine by the E-Acceptance Flag in LOSA_APP_E_ACCEPTANCE_FLAG field. - If the application not eligible to perform EAcceptance, the system will display message: 'Application not eligible for EAcceptance, please proceed with manual acceptance' and not allow user to proceed. - If the application eligible to perform E-Acceptance, system will allow the application to proceed.	New
ValidateEAcceptanceCombo	To validate if the application allows to perform permutation of E-Acceptance and Manual Acceptance.	The system to validate if eligible application have submitted appeal, system shall check across the E_ACCEPTANCE_COMBO general constant. - If E_ACCEPTANCE_COMBO = E[E], the system will only allow an application to be fulfilled via E-Acceptance. In the event, if customer would like to change to manual acceptance from E-Acceptance, the system will display message: 'Application not allow to change to manual acceptance, please proceed with E-Acceptance' and not allow user to proceed. - If E_ACCEPTANCE_COMBO = E[M], the system will allow an application to be able to be fulfilled by E-Acceptance or manual acceptance or a combination of both.	New
ValidateBiometricComplete	To validate, the biometric is complete.	The system will check if the biometric (Customer Biometric/E-Acceptance) is completed.	New

		a. If the biometric status is 'Matched', the application will be able to proceed with the eacceptance journey b. If the biometric status is 'Unmatched', the system will display message: 'Verification failed, please proceed with manual acceptance'. The application needs to proceed via a manual journey. c. If the biometric status is 'Not Done', the system will prompt the error message "Please complete the [Verification type] Biometric Verification". The application will not proceed. d. [Verification type]: 1. Identity Verification 2. E-Acceptance Confirmation e. If the biometric verification fails with an error, the user can retrigger the biometric verification with the maximum entry set in the general constant. In the event where the user exceeds the number of maximum retriggers, the system will fail the biometric verification and the customer will need to proceed with manual acceptance. Note: • General constant to control to the maximum attempt of biometric verification: BIOMETRIC_ATTEMPT_COUNTER • The full listing of biometric status will be provided at a later stage during development.	
isEAcptAmendment Complete	To check if the E-amendment confirmation is received.	LOAD\$ will check if it has received the E-Amendment acceptance and confirmation from RIB. If the E-Acceptance Amendment Flag = 'Y', the system will allow the application to proceed. If the E-Acceptance Amendment Flag is = Blank, the system will prompt the error message "Customer has not performed acceptance on the amendment request." The application will not be allowed to proceed. This validator will be running until and unless the EAcceptance Amendment Flag is received from RIB. Note: This validator only will check for the application that have submitted appeal.	New

ValidateEAcceptance Complete	To validate is E-Acceptance complete.	LOAD\$ will check if it has received the E-acceptance and confirmation from RIB. If the E-Acceptance Flag = 'Y', the system will allow the application to proceed. If the E-Acceptance Flag is = Blank, the system will prompt the error message "Customer has not performed acceptance." The application will not be allowed to proceed. This validator will be running until and unless the EAcceptance Flag is received from RIB. Note: This validator only will check for the application is eligible for E-Accpetance.	
---------------------------------	---	---	--

13. CONFIGURATION SETUP

13.1. General Constant

The following new general constant(s) will be introduced in this enhancement.

Business Unit	Type	Constant Code	Constant Description	Value	
CED	LOSA	E_ACCEPTANCE_ON_OFF	E-Acceptance turns ON / OFF	Value and expected behaviour as follows:	
				Value	Expected Behavior
				ON	If this constant is ON, the E-Acceptance functionality will be switched on.
				OFF	All applications will proceed with the existing manual acceptance route.
CED	LOSA	E_ACCEPTANCE_COMBO	The combination which allows E-Acceptance to be performed.	Value and expected behaviour as follows:	
				Value	Expected Behavior
				E[E]	The system will only allow an application to be fulfilled via EAcceptance.
				E[M]	The system will allow an application to be able to be fulfilled by E-Acceptance or manual acceptance or a combination of both.
CED	LOSA	E_ACCEPTANCE_GOLIVE_DATE	Cutover date for E-Acceptance Enhancement	This enhancement is only applicable to new applications created after Go Live. Existing / pipeline cases will use old screens and logic. Value: DD/MM/YYYY 00:00 Note: During the initial loading system, will auto set based on deployment date+time.	

13.2. Common Code

13.2.1 Type Of Letter

Menu: **Parameter > Common Codes > Code Table: DOCUMENT MANAGEMENT SYSTEM**

The following are the existing common codes for letter templates. In this enhancement, additional letter templates will be required to be added in code type 'LETTER_T'. List of documents as below:

No.	Letter Group	Code	Details Description	Remarks
1.	Others	HPPDS_E	PRODUCT DISCLOSURE SHEET (E-ACCEPTANCE)	Template to display esignature information.
2.	Others	HPSS_E	HP SECOND SCHEDULE (EACCEPTANCE)	Template to display esignature information.
3.	Others	HPA_E	HP AGREEMENT (PART 1) (EACCEPTANCE)	Template to display esignature information.
4.	Others	HPA4_E	APPENDIX 4 CUSTOMER/HIRER INDEMNITY LETTER (EACCEPTANCE)	Template to display esignature information.
5.	Others	HPPDS_EA	PRODUCT DISCLOSURE SHEET (E-ACCEPTANCE AMENDMENT)	Template to display highlighted changes during amendment.
6.	Others	HPSS_EA	HP SECOND SCHEDULE (E-ACCEPTANCE AMENDMENT)	Template to display highlighted changes during amendment.
7.	Others	HPA_EA	HP AGREEMENT (PART 1) (E-ACCEPTANCE AMENDMENT)	Template to display highlighted changes during amendment.
8.	Others	HPA4_EA	APPENDIX 4 CUSTOMER/HIRER INDEMNITY LETTER (E-ACCEPTANCE AMENDMENT)	Template to display highlighted changes during amendment.

13.3. SMS Template

SMS template to inform the customer on the readiness of the document for viewing and acknowledgment.

Menu: Parameter > Origins > SMS/Email Message Setup

Product Type: HP

Language: English

Reason Type: Other Notification Reason

Code: EAA

Description: E-Acceptance Amendment Notification

Gateway	Infobip
Is HTML	(blank)
Email Subject	(blank)
Email Content	(blank)
SMS Content	RM0.00 HLB: Dear customer, please review and accept the changes to your loan/financing documents via the link below. www.hlb.com.my/etracker
Letter Generation Option	(blank)
Letter Type	(blank)
Recipient	Primary Customer
CC	(blank)
Do not use batch scheduler	(blank)
Condition	(blank)
Password Protect	(blank)

13.4. Letter Templates

The field definition of letters in the following section that remain no change will be in the excel below:

Template List.xlsx

13.4.1 HP Agreement (PART 1) (E-Acceptance)

Letter template for **HP Agreement (Part 1)** include as below:
